

Testimonial for NO-WET product.

To Whom It May Concern:

“We are using NO-WET waterless cleaning spray in a micromist applicator for cleaning and preparing our customers vehicles inside and out.

It gives a brilliant finish, a clean, fresh smell and is quick and easy to use.

Because NO-WET does not use water, even for quite dirty cars, the vehicles can be prepared on the spot, anywhere, inside and out, saving time, money and water.

Our display cars inside our showrooms can be kept immaculate with just a quick spray, and this is also helping with fingermarks and giving more protection for the new vehicles.

On a personal note, I own an antique Alfa Romeo – one of only two in Australia. It is covered and protected inside, but the dust still builds up. Since using NO-WET, the anti static properties keep the car cleaner and the shine gets deeper and richer, every time I use it.

I have no hesitation in giving my confidence to and endorsement of this new product.”
